Created By: Signing Savvy List Details This is an official Signing Savvy members-only word list. Since you are not currently a full member of Signing Savvy, you can only preview some of th features of this word list. Become a Signing Savvy Full Member to access all th word list features. Member Tools you can type any number in th search box to see th sign for th number. A great place to start learning th ASL numbers is with this word list. Hand Position / Palm Orientation Hand positioning when signing numbers can be confusing! We've noted palm orientation guidelines for each set of numbers in th lists below. For some numbers, your palm orientation will either face toward or away from your body as you are signing numbers depending on why you are signing them. For example, if you are signing a quantity, the palm of your hand should face away from your body while you are signing the number(s). If you are just signing a number, then the position of your hand varies depending on th number you are signing. Once you know the individual numbers and how to count in ASL, you are ready to start making larger numbers and series of numbers. We have th Savvy Numbers Quiz and Savvy Numbers Flash Cards tools to help you practice your receptive numbers skills. Check out th tools to help learn numbers: Printable Posters Here is a printable poster that corresponds with this wordlist: Number Vocabulary List Words: 14NUMBER There is a unique sign for th numbers one through five. Palm Orientation: Your palm should face toward your body when signing the numbers 1 through 5, unless you are specifically indicating a quantity, in which case your palm should face away from your body as you sign. List Words: 51(as in "the number or amount and when counting")2(as in "the number or amount and when counting")3(as in "the number or amount and when counting")4(as in "the number or amount and when counting")5(as in "the number or amount and when counting") There is a single sign for th numbers six through ten. Palm Orientation: Your palm should always face away from your body when signing the numbers 6 through 10. List Words: 56(as in "the number")7(as in "the number")8(as in "the number")9(as in "the number")10(as in "the number") There is a single sign for th numbers eleven through fifteen. The numbers 11 through 15 have a repeated motion. Palm Orientation: Your palm should face toward your body when signing the numbers 11 through 15, unless you are specifically indicating a quantity, in which case your palm should face away from your body as you sign. List Words: 511(as in "the number")12(as in "the number")13(as in "the number")14(as in "the number")15(as in "the number") For these numbers, you sign a combination of two signs: 10 and the following single-digit number. For example, to sign 16 you would use th sign for 10 and the sign for 6 quickly put together. Palm Orientation: Your palm starts facing your body and then turns out away from your body as you transition from th 10 handshape to th single-digit handshape when signing th numbers 16 through 19. List Words: 416(as in "the number")17(as in "the number")18(as in "the number")19(as in "the number") There is a unique sign for 20. It has a repeated motion from a modified 2 (similar to an L) handshape to a modified 0 handshape. Palm Orientation: Your palm should always face away from your body when signing the number 20. List Words: 120(as/Using American Sign Language (ASL) to represent numbers is an essential skill for effective communication. Here are some key points to remember: Lit Arts Stories, poems, performance arts in sign language. First Language This documentation project follows a child's language acquisition, literacy development, and phonological acquisition in sign language, specifically ASL as a first language (L1), from newborn to age five in a natural native-ASL environment and visual culture. Numbers 1-10 / 11-20 / 21-30 / 31-40 / 100-900 / 1000 and up / Fractions FRACTIONS One-half. Casual way to sign 1/2, everyday usage, palm back with fingertips pointing somewhat to the left. One-fourth: Show numerator, then move hand down a bit to show denominator. Numbers in Sign Language vary according to region you live in, we use numbers more than realise. Basic signs needed to communicate in BSL, like date, age or door number. For example, someone ask you for date or how old you are, or your door number.As become more fluent, learn other ways to use numbers, like describe weight of something or height of person. Also need to know give directions to location e.g at traffic lights, take third turn right.There lots online resources show you sign numbers, sharing best videos we can find with explanation how to sign numbers and different ways numbers used.Table of ContentsVideos below show basic numbers 1-30, 100, 1000, 1 million. Also included regional variations.Numbers easy to learn essential BSL, why learn on basic courses and Level 1.All regions show same numbers for 1-5, here how sign:Sign with hand facing towards you, holding up at chest height, raising index finger for number one, then index and middle finger together represent two, third finger represents three and so on.U.S. numbers different from other English-speaking countries, but some basic signs same. Southern variation use thumb bent at knuckle for 6, northern use little finger extended for six.Southern variation start from thumb add digit as number increase e.g thumb and index finger represent seven.Northern variation go from little finger upwards so little finger and ring finger represents seven.BSL SignBank videos show variations of number signs used by deaf community. We recommend view SignBank website explore signed videos regional differences in British Sign language.Hundreds, thousands millions represented differently in different regions. Important to be aware regional differences particularly if learning Level 2 and above.Some numbers difficult to sign, like London South East for number nine need bend little finger.Video explores topics including handshapes placement lip pattern important in sign language clear sign needed someone understand. When signing double digits see hands move left to right, digits seen as in maths e.g twenty-one 2 in tens column one in units column.Higher numbers signed differently regional UK variation signed under chin for one hundred silently mouthing word. Numbers like thousand signed differently, southeast variation use comma draw symbol silently mouthing one thousand.Sign language borrow from other languages some BSL signs use English mouth patterns clarify same sign different meaning when mouth pattern used.DSL provides explanation use mouth patterns example signs number date both use same sign but have different mouth patterns.BSL numbers used everyday conversation like showing door numbers postcodes mobile phone numbers time age money quantity counting mathematics enumeration show first second third etc. BSL numbers also show time quantity distance.Numbers in Sign Language easy learn straightforward learn tutor teach you all signs correct handshape position lip pattern ensure accurate number sign.Numerals 0-9 colour posterMore BSL study tips resources why not start with fingerspelling alphabet chart?The basics of signing numbers in BSL, from one thousand to millions, including various examples and explanations for each number, as well as discussions on fractions, numerical variations, and tips for learners. Looking forward to teaching your kids American Sign Language numbers with these free printable poster and cards. I taught my boys ASL sign language when they were babies and it was a fun challenge for me. Even now, I prefer using sign language numbers instead of counting on two hands - it's more efficient and great for finger motor skills too! These printables are perfect for teaching your kids ASL numbers from 1-10. They show how to make each number with the corresponding handshape and location. The printable poster has a simple design that shows the number one to ten in order, while the cards provide additional practice for each number. The set includes 12 cards, including a cover and mini version of the poster. I highly recommend laminating them for durability. These free printables are designed to help you teach your kids ASL numbers in no time. They're ideal for parents, teachers, or anyone looking to introduce their child to American Sign Language. By teaching your kid ASL numbers, you'll be giving them a head start and making it easier for them to learn new concepts.
