## Hot math teacher

Pietro Boselli, a math teacher turned model, has been navigating the challenges of maintaining his viral fame since 2014. With 1.9 million Instagram followers, he has been trying to diversify his content by posting workout videos and attempting to showcase his comedic side. However, his recent video, where he pretends to hunt a local Filipino man to use as a human barbell, has sparked controversy and criticism for being racially insensitive. Many have pointed out that the video objectifies the Filipino man, reducing him to a mere prop without a name or agency. Boselli has responded by stating that he is "so far removed from racism" and that the video was meant to be funny, but critics argue that his attempt at comedy fell flat and reinforced racial stereotypes. The incident highlights the difficulties of navigating cultural sensitivity and the importance of considering the impact of one's words and actions on others. Boselli's failure to identify the Filipino man as his friend and instead portraying him as a random native to be hunted has been cited as a major misstep, and the situation could have been avoided with more thoughtful consideration. The world of comedy, especially when it comes to online platforms, can be unforgiving. Even experienced comedians face risks, including the possibility that their jokes might not land well with audiences. This is particularly true for those who venture into new territory or try to make a name for themselves in an unfamiliar field. The same risks apply to individuals who attempt to leverage their existing popularity online. For instance, former Vine stars often struggle when their old content surfaces again. A similar fate could befall anyone who decides to pursue comedy as a side hustle, especially if they're not experienced comedians. There are times when it's better to stick to what you know and excel at rather than trying something new. Sometimes, simply sharing your personality or talents through social media can be enough – like posting an engaging video of yourself doing squats on the beach in a speedo with another man on your shoulders. Leave the comedy to those who specialize in it. Just posting a picture isn't always a bad thing; sometimes it's a clever way to avoid potential pitfalls. Pietro Boselli has been making headlines since 1995 when he appeared on the cover of Vogue Bambini as an Armani Junior model. He's also climbing mountains in short shorts, riding motorcycles from France to Italy, and pursuing a PhD in Engineering. Some people might find his passion for wood intriguing – and so do Dean and Dan Caten. There's even a 17-year-old schoolgirl who gained widespread recognition after being mistakenly identified as the "world's sexiest teacher" due to her resemblance to another girl whose video went viral online. People have found a video of Oksana Neveselaya, a 80-year-old model, dancing on a table. Is she the sexiest grandma in the world? Meet Oksana, who is making waves on the catwalk and getting pulses racing. Oksana said: "I've denied this many times, but as the comments keep pouring in, it's pointless for me to keep saying I'm not her." She also revealed that she struggles with mathematics, scoring only 7 out of 10. Oksana has always been passionate about chess and often skipped classes to participate in tournaments. Oksana now has almost half a million followers on Instagram, but her real identity remains unknown. Last year, there was Pietro Boselli, the hunky math professor who became an internet sensation. Now, it seems we've found his female counterpart. Oksana is a math teacher from Minsk, Belarus, and recently went viral when one of her students recorded her in class and shared it on YouTube. People are mesmerized by her beauty and intelligence, with hundreds of thousands following her on Instagram. With her charm, could she be landing movie deals or modeling gigs? Oksana is proving that women can be intelligent and beautiful at the same time. Robert Ligthvoet, a 28-year-old Dutch math teacher, is making waves on social media with his charismatic personality. But what's not well-known about Robert is that he's also a model and traveler. He tries to inspire people worldwide to be adventurous. We'd like you to meet him, the unconventional math teacher. 1. 2. 3. 4. 5. 6. 7. 8. 9. 10. 11. 12. 13. 14. 15. 16. 17. 18. 19. 20. 21. 22. 23. 24. 25. 26. 27. 28. 29. 30. 31. 32. 33. 34. 35. 36. 37. 38. 39. 40. 41. 42. 43. 44. 45. If you're curious about Robert's exciting travels and modeling, check out his Instagram page. Remember, kids: knowledge is power! Prioritize school, okay? Pietro Boselli, a 33-year-old Italian, was dubbed the "world's hottest math teacher" after one of his University College London students posted a photo of him on Facebook in 2015. The post gained over 2,000 likes. Boselli has since appeared in Armani campaigns and even gives online lessons on love to thousands of fans. A man known as 'the world's hottest maths teacher' is now sharing his insights on love with millions of adoring followers. Pietro Boselli rose to fame when his engineering students took secret photos of him during classes at University College London and shared them on social media in 2016. He quickly transitioned from the lecture hall to the catwalk due to his good looks. Boselli is back in the classroom, but this time he's giving online lectures from his Instagram page, which has an astonishing 2.7 million followers. He's uploaded a series called 'In Depth,' answering some of the interesting questions people have asked him. His lessons cover topics such as "most research findings are wrong," "the scientific method is not what you think," and "how to not care what others think." But it was his lesson on love that got fans excited. Boselli's video, 'What is love (the chemistry of love),' talks about the subject from a purely scientific and logical perspective, as befits his mechanical engineering background. He notes that he still appreciates love songs and poetry but emphasizes the importance of pursuing knowledge without distraction. Always come out better off is Pietro Boselli's take on love being not just a feeling but more of a primary motivational system. According to him, it's like baking a cake, where you mix different ingredients - chemicals or "sponge, filling and icing" - to make something special emerge. In his view, attraction and lust are not the same thing but both contribute to making love, which can be likened to following a recipe. Pietro explains that things do not always follow in a certain order but may happen independently. By Jenny AWFORD For MAILONLINE Published: 02:40 BST, 29 March 2015 Updated: 18:05 BST, 29 March 2015 Pietro Boselli was teaching at University College London when one of his students discovered him as a fashion model. Pietro Boselli's life took a dramatic turn when renowned designer Giorgio Armani spotted him and thought he'd make a great model. His Instagram account offers a glimpse into his rigorous fitness routine, featuring a poolside snapshot captioned: "Boosts circulation, gets metabolism up to speed and strengthens immune system!" The model revealed that he works out an impressive two to three times daily, crediting his perseverance and consistency as his greatest assets. In a separate interview, Boselli shared that if he weren't modeling, he'd be dedicated to engineering, teaching math, or personal training. He showcased his chiseled abs on social media, accompanied by the caption: "Lying in bed... My point of view". The dashing model revealed his admiration for icons like Arnold Schwarzenegger, Oscar Wilde, and The Rolling Stones. Fans have flooded social media with enthusiastic responses, joking that they would've paid more attention in class if Boselli were their math teacher.
