Time Travel

Frank and Phil were on very short notice. With no experience and little money, they would have given up a long time ago. They were busy trying to figure out how to build the time machine. It wasn't until they had a breakthrough that they were able to build the great machine. They were three years ago. Now they are in the past and they are still working on it. Hopefully they will have it done in the next couple months. But if they get it done it will still have to work. That is the hardest part of the project.

"You're were going to get that thing to work," Frank exclaimed.

"Yes if you don't want to have part of me time machine you can just leave right now."

"That is not what I am saying Phil. I want to be a part of it but we can't work on it if you would stop out with out a break. I don't see how it takes a break when we started this thing."

"By Frank, when you become rich and famous you will think we but we didn't take a break. Right?"

"Yes, I guess so, well let's get this thing built and get rich and famous."

"Sounds good to me."

"What if you take the space out of the diameter of the time lines the distance around the machine that is going to be the mechanism to travel through time, does that seem right to you Phil?"

"The last seems right to me."

They worked day in and day out for the next four months, and then they finally finished it. They were ready for their first flight through time. They didn't tell the police because they didn't want to look stupid if they didn't succeed. So they kept everything a secret. Which they will find out that was a bad idea.

"Phil, are you ready for our first flight tomorrow?"

"I guess, let's get the machine going to see if it works."

"Okay the time to do is to set the time machine clock to destination time and return time."

"Let's get this paper working."

NOPE!

"This thing is not efficient Frank!!!!"

"I know, I don't know what is happening to it but it's not right, I don't know why else what it is doing or when it is going to go?"
