All known languages contain personal pronouns. English in common use today has seven personal pronouns: in the first person singular (I), in the first person plural (we), second person singular and plural (you), in third person, unique human or animated male (EL), Third-person Singular human or lively female (her), third inanimate singular person (IT), third plural (them). In standard use in English, each verb must have an explicit subject, with the exception of an imperative verb (a command) where the subject is always "you" (unique / plural), even when the context is already understood, or it could be understood.
