1 Free Electron Model (PDF) 2 Crystalline Lattice (PDF) 3 Debye Waller Factor and Incommensurate Structures (PDF) 4 Point Group for Bravais Lattice (PDF) 5 Bloch Theorem (PDF) 6 Band Structure (PDF) 7 Orthogonalized Plane Wave (OPW) (PDF) 8 Pseudopotential and Augmented-Plane-Wave (APW) (PDF) 9 Tight Binding, van Hove Singularity (PDF) 10 Experimental Tests of Band Structure and A Survey of the Periodic Table (PDF) 11 Semiconductors: Donors, Acceptors and Excitons (PDF) 12 Semiclassical Dynamics of Electrons, Bloch Oscillation and Quantization of Orbits in a Uniform Magnetic Field (PDF) 13 de Haas-van Alphen Effect and Quantum Hall Effect (PDF) 14 Quantum Hall Effect and Edge States (PDF) 15 Electron-electron Interaction: Hartree-Fock Approximation (PDF) 16 Exchange Energy for Jellium (PDF) 17 Density Functional Theory (PDF) 18 Hubbard Model, Screening and Plasmons (PDF) 19 Phonons (PDF) 20 Electron-phonon Coupling and Electron Lifetime (PDF) 21 Attraction by Exchanging Phonons (PDF) 22 The Cooper Instability and the BCS Wavefunction (PDF) 23 The Bogoliubov Quasiparticles (PDF) 24 Ginzburg Landau Free Energy, Meissner Effect and Flux Quantization (PDF) A synthetic bismuth crystal. The bottom front edge has a length of about 3.5cm. The irridescent color is created due to interference effects in a thin oxide layer, which forms when the hot crystal is pulled out of the bismuth melt. (Image courtesy of Wikipedia user Dschwen.) Lecture 1: Molecules–the Simple Solid (PDF) Lecture 2: Vibrational and Rotational States in Hydrogen (PDF) Lecture 3: Metal as a Free Electron Gas (PDF) Lecture 4: Vibrations in Solids (PDF) Lecture 5: Specific Heat of Lattice Waves (PDF - 1.4 MB) Lecture 8: Lattice Waves in 1D Monatomic Crystals (PDF) Lecture 9: Lattice Waves in 1D with Diatmomic Basis (PDF) Lecture 10 & 11: Specific Heat of Discrete Lattice (PDF - 1.1 MB) Lecture 12: Electrons in a Periodic Solid (PDF) Lecture 13: Electrons in a Periodic Solid (PDF) Lecture 14: Electrons in a Periodic Solid (PDF - 3.2 MB) Lecture 15: Electrons in a Periodic Solid (PDF - 3.1 MB) Lecture 16: Nearly Free Electron Bands (PDF - 1.2 MB) Lecture 17: Nearly Free Electron Bands (Part III) (PDF) Lecture 18: Properties of Bloch Functions (PDF) Lecture 19: Motion of Electronic Wavepackets (PDF) Lecture 20: Impurity States (PDF) Lecture 21 & 22: Semi Classical Equations of Motions & Electrons and Holes I (PDF - 1.1 MB) Lecture 23: Effective Mass (PDF - 1.1 MB) Lecture 24: Chemical Potential and Equilibrium (PDF) Lecture 25: Chemical Potential and Non-equilibrium (PDF) Lecture 26: Inhomogeneous Solids (PDF) Lecture 27: Scattering of Bloch Functions (PDF) Lecture 28: Electron-phonon Scattering (PDF) Page 2 Page 3 Description: ?Real? Semiconductor Project: GaAs Lecture 1: Molecules–the Simple Solid (PDF) Lecture 2: Vibrational and Rotational States in Hydrogen (PDF) Lecture 3: Metal as a Free Electron Gas (PDF) Lecture 4: Vibrations in Solids (PDF) Lecture 5: Specific Heat of Lattice Waves (PDF - 1.4 MB) Lecture 8: Lattice Waves in 1D Monatomic Crystals (PDF) Lecture 9: Lattice Waves in 1D with Diatmomic Basis (PDF) Lecture 10 & 11: Specific Heat of Discrete Lattice (PDF - 1.1 MB) Lecture 12: Electrons in a Periodic Solid (PDF) Lecture 13: Electrons in a Periodic Solid (PDF) Lecture 14: Electrons in a Periodic Solid (PDF - 3.2 MB) Lecture 15: Electrons in a Periodic Solid (PDF - 3.1 MB) Lecture 16: Nearly Free Electron Bands (PDF - 1.2 MB) Lecture 17: Nearly Free Electron Bands (Part III) (PDF) Lecture 18: Properties of Bloch Functions (PDF) Lecture 19: Motion of Electronic Wavepackets (PDF) Lecture 20: Impurity States (PDF) Lecture 21 & 22: Semi Classical Equations of Motions & Electrons and Holes I (PDF - 1.1 MB) Lecture 23: Effective Mass (PDF - 1.1 MB) Lecture 24: Chemical Potential and Equilibrium (PDF) Lecture 25: Chemical Potential and Non-equilibrium (PDF) Lecture 26: Inhomogeneous Solids (PDF) Lecture 27: Scattering of Bloch Functions (PDF) Lecture 28: Electron-phonon Scattering (PDF) --------------------------------------- Page 2 --------------------------------------- ---------------------------------------
