Your apps, recommended videos and offers are at the top of Android TV. It is also called the initiator. Unfortunately, the design of the native Android TV launcher is often criticized by the community. However, it is possible to change the Android TV launcher on your device. It's easy to download an alternative option with other menu, fonts, layouts and more. And in that sense, here are the best Android TV launch apps to consider. 1. Ugoos TV The most popular Android TV launcher is probably Ugoos TV. The user interface is a clear deviation from the regular Android TV launcher. On the left side of the screen you can see a scrolling circle where you can assign broad categories (eg all programs, internet, games, options, etc.). There are nine categories in total. All programs that fall under the BOLD category are displayed on the right side of the screen to select and open them. UGOOS TV has nine different subjects and supports tailored backgrounds, tailored symbols and adaptive remote control. Download: Ugoos TV (FREE) If you have Samsung or LG Samsung or Tizenos or WebOS, TVHOME launch device. If you want to spice up the smart TV experience, TVHOME is one of the best launch tools for Android TV you'll find. All your apps on the screen are displayed in a minimalist individual row. You can visit Android TV remote control list with left and right button. Background image can be applied. TVHome launcher also has minimal consumption of your system resources. This launcher is definitely worth a try if you have a cheaper Android TV box with poor performance. Download: TVHome Starter (Free) Simple TV is another minimalist Android TV launch tool. There are six application sockets on the home screen and you can select the applications that should be displayed in the sockets. If you have access to the full list of programs, click the appropriate character in the upper left corner. In the lower right corner you will find a symbol with which you can access the Android TV menu. A simple TV launcher is open code - you'll find the GitHub source code. If you have enough time and knowledge, you can make the starter tool the basis for your creation. Download: A Simple TV Launcher in Inlet (Free) We talked about this version>Your apps, recommended videos and menus are all on your Android TV home screen. This is also known as initiation. Unfortunately, the native Android TV trigger design is widely criticized by the community. However, you can change Android TV on your device. It is easy to download an alternative option with different offers, fonts, layouts and many others. And with this are the best Android TV Launcher applications that can be used. 1. UGOOS TV The most popular trigger Android TV, maybe Ugoos TV. The user interface is a significant departure from the early Android TV you are used to. On the left side of the screen you can see a slider that you can use to display wide categories (such as all applications, internet, games, options, etc.). A total of nine categories. All applications falling into the selected category are displayed on the right side of the screen to select and open them. UGOOS TV has nine different topics and supports its own background, customizable characters and adaptive remote controls. Download: UGOOS TV (free) If you have Samsung or LG Samsung or LG that triggers tizenos or webos, is an instantly known model of TVHOME. If you want to re-create an experience from Smart TV, TVHOME is one of the best triggers for Android you find. All of your applications will appear at the bottom of the screen in a minimalist single line. You can browse a list of left and right button on the Android TV remote control. The background image is configured. TVHOME trigger is also great thanks to minimal collection of your system resources. This launcher is definitely worth it if you have cheaper, inefficient Android TV box. Download: TVHOME LAUNCHER (free) Simple TV is another minimalist scene for Android TV. There are six applications on the home screen that you can choose from applications that appear in the slots. If you need to access the entire application list, click the icon in the upper left corner. In the lower right corner you will find a symbol to go directly to the Android TV settings menu. Simple TV Start is an open source code. The source code can be found on GitHub. If you have enough time and knowledge, you can use the starting installation as the basis for your own assembly. Download: Simple TV Launcher (FREE) In the beginning we mentioned that versionThe Android TV launcher made many users angry. It is not so easy to use or aesthetically pleasant as previous generations. Unfortunately, if you want to go back to the oldest images, you are unlucky. The Halauncher app is very similar to the previous design; You will find apps on one line and play on another. Halauncher also has a huge advantage over the official launcher: it supports Android TV on the initial Android screen. This means that you don't have to resort to a horrible solution to access Android apps. Finally, like many other launchers in this list, Halauncher allows you to add your background image. Download: Halauncher (free) if you want full control over the personalization of the initial Android TV screen, we think that Tic TV Launcher 2 is the best Android TV launcher for your needs. It has an integrated layout editor; You can use it to place apps anywhere on the screen and add widgets and elements. You can even create your boxes using the integrated pane editor or by adding an ICO file or an image. There is also the possibility of adding multiple apps to a single element to access the folders, support apps protected by personalized PIN and background options. Maybe the best of all? Tobe Launcher 2 is without advertising. Download: Tobe Launcher 2 (\$ 3,12) depending on the Android TV Box you have, there is the possibility that the official Google Launcher is no longer preloaded. There have been many complaints about the design and usability of the pitcher, but we know from experience that some launchers produced by the producers are far lower. In addition, there is always something to say for Android in any form. This means that you can be sure that it will work as expected and it is unlikely that it breaks. Free download of Android TV Launcher. Download: Android TV Launcher (free) ATV Launcher is a light launcher for Android TV. Despite its reduced dimensions, the start program can be easily customized. It offers support for widgets (which is excellent for keeping up with the weather, program or sporting results), the possibility of personalizing what is on the screen and a way to change the background of the app. It also allows you to perform apps for TV and smartphones, which is a huge advantage if you want to load apps. Download: ATV Launcher (Free Premium version available) Some Android TV devices have no Google Play installed. In this case, you could try to install the start-up programs we haven't the device. Instead, you'll need to install them. There are generally three ways to install apps on Android TV: use the web version of Google Play and select your device from the drop-down list. Download the APK using the browser on Android TV. Transfer the APK to your device using a USB drive. Some apps don't require you to download unreleased apps. For example, you can install Google Chrome on Android TV with minimal effort. In our opinion, there is only one Android TV launcher that will stand out from the crowd. All of them are focused on different user subgroups. Consider questions like "how many apps do you use often" and "what features are most important" before making a final decision. In this article, we will discuss how to install the Google TV launcher on any Android TV before we get started. This can be difficult because the APK download will not work. This is due to default/common source settings in the Android TV launcher. Look carefully at the article below because we use some unknown methods for many users. However, if you follow the instructions below, you are unlikely to encounter any problems. According to Playlist on the Google TV Launcher, "Google TV Home is the home of all the action on your Google TV entertainment device. Watch thousands of movies, shows and TV channels directly from your subscriptions without having to switch between apps. Discover new things to watch with recommendations based on what you look like and what interests you. Proceed with caution. First, we will upload the steps to install Google TV Launcher and install APK on Android TV. Download both APKs from the above links. You can use any method to do this. You can use any thumbpad, but we like to use it to send the file to the app. Follow the steps below, click on the gear icon on your current home screen, then go to device settings and open it, now go to security and restrictions, and then to unknown sources, finally turn the slider to the right of solid explorer (or the conductor you've chosen). files). Now go back to the main page and open the persistent conductor. After openingExplorer, find these APKs, install them by clicking one after the other. Now go back to the homepage and open the Play Store, look for Android TV Launcher Tools and install it. After successful installation, try to press the main button on the remote control; As soon as you click on the start button, the television recognizes a new launcher like Launcherx, which is nothing more than Google TV Launcher. Open it and your Android TV becomes a brand new Google TV. However, this acts as the installation of a third-party provider. You have to open the home app every time to enjoy new Google TV starts. You will not find a way to determine it as a standard launcher that we see on an Android device. Therefore, we will deactivate the standard start of Android TV to define the new Google TV start as standard. Open Android TV. Then go to the creation version in the section. Now click on it until the developer options are activated. Go back to the device setting menu and open the developer options. Now activate the USB equalization, and network combination. Finally go back to the section and click on the status to get the IP address. Now go back to your computer; We connect your Android TV to your computer via ADB. The installation of ADB on a desktop/laptop process is a little tricky, but those who are familiar with ADB will be able to make it very easy. Well, nowadays most people are not familiar with ADB, so we first set up ADB on your system (desktop or laptop). Download platforms (ADB and Fastboot drivers). Move the downloaded file. (Think of the street, you will need it later) You can find the platform name folder, this folder consists of files such as adb.exe or Fastboot.exe, which now open in CMD management mode. Copy the street folder pass, i.e. H. Platform tools. And insert it into the CMD window with the front of the CD; Take a look at the following example: CD F:\ Utility \ Android \ Berlium \ Platform-Tools Another trick is to open cmd directly with the exact directory. Open the folder in our case aplatform tools. You see the path in the view bar. Click on the view feed and remove the street from there. Finally, enter CMD in this window and press the input key. Boom opens an input request in the same directory. Now enter this command. Note: You may have to add a: 5555 to get this functioning ADB connection [insert IP address]; 5555 afterwardsUse this command to deactivate the default Android TV starter: Adb shell pm noninstall akullanca 0 com.google.android.tvlauncher had so much. You have completed all the steps to successfully record Google TV launcher on Android TV. If you want to go back to the old initiator, use the following command: ADB Shell CMD pack to install com.google.android.tvlauncher Google TV Launcher, use only in the United States, so you are in a country like India, the launcher that you will not be able to fully use. In this case, you will not see personalized cards, reasonable suggestions on the home screen and several problems here. Therefore, we will need to use the VPN service to replace our as a virtual position to properly use the starter. Don't forget to this installation that you will get both locals and us. You can use free and paid VPN; Here are several suggestions you can choose. However, if a new generation of Chromecast is available in your country, you do not need to use VPN for Google TV. Entrance.
