Definition : Medicinal/Pharmaceutical chemistry deals with the discovery, design, development and both pharmacological and analytical characterisation of drug substances. Nevertheless, the original pattern and style of presentation of the running text content with a specific emphasis on the synthesis of potential medicinal compounds have been anchored strongly, for the wholesome benefits of the teachers and the taught alike. The present edition essentially contains three new chapters entitled : (a) Molecular Modeling and Drug Design (Chapter 3) ; (b) Adrenocortical Steroids (Chapter 24) ; and (c) Antimicrobial Agents (Chapter 26) It is further strengthening and enriching the subject matter of the present textbook upto thirty chapters.
